

## **Kazuhiro Kajiyama**

Dr. Kazuhiro Kajiyama is a safety reviewer of Office of Medical Informatics and Epidemiology, Pharmaceuticals and Medical Devices Agency (PMDA), Japan. He graduated with a PhD in Computational Biology from Yokohama City University in 2013. He worked to analyze data derived from next generation sequencing technology and involved in transcriptome research in Omics Science Center, RIKEN Yokohama institute as a junior research associate from 2009 to 2013. He joined PMDA and started to work on post-marketing drug safety assessment by utilizing medical information data as a safety reviewer in the Office of Safety I in 2014, and the Office of Medical Informatics and Epidemiology from 2015 to 2018. His current work is reviewing post-marketing safety surveillance plans, assessing drug safety by employing the pharmaco-epidemiological methods with utilization of MID-NET and National Claims Database in Japan.
