

## **ICPM 2018**

### **Workshop 2**

#### **Ethics in Medicines Development**

##### **Topics:**

- **Managing multi-professional and multi-disciplinary teams**
- **Ethics Committees in Asia**
- **Ethical issues in gene therapy**
- **Social and ethical problems in drug pricing**

##### **Chairs:**

- **Kurihara, Chieko (NIRS, Japan)**
- **Kerpel-Fronius, Sandor (Semmelweis University, Hungary)**

##### **Panelists:**

- **Boyd, Alan (FPM, UK)**
- **Kerpel-Fronius, Sandor (Semmelweis University, Hungary)**
- **Koski, Greg (ACRES, US)**
- **Kurihara, Chieko (NIRS, Japan)**

##### **Objectives:**

- **To increase awareness of new, emerging ethical problems in medicines development**
- **To contribute to the understanding of ethical questions connected to the cooperation of physicians and life scientists in multidisciplinary teams**
- **To focus on potential regional differences in considering ethical questions with special emphasis on Asia**
- **To pay attention to particular ethical problems in gene therapy development**
- **To understand ethical-social problems in the context of drug pricing**

##### **Learning outcomes:**

- **Critically appraise ethical issues related to the development of advanced therapies**
- **Evaluate and manage ethical issues of multidisciplinary clinical trial teams**

- **Describe and evaluate specific ethical issues in the Asian region**
- **Define and manage particular ethical problems in gene therapy related clinical research**
- **Analyze and manage the consequences of ethical-social issues in drug pricing**
